Accounting for Card  
Clients. It is becoming  
increasingly difficult for  
ordinary consumers to keep  
up with, or stay on top of, the

---

barrage of product announcements that hit their news feeds on a daily basis. This could present a challenge for digital advertisers that want to target such a busy audience. According to Movable Ink, there are now approximately 130 million first-time smartphone users in the U.S. alone. As mobile users, they are also consuming

---

more video than ever before and are increasingly consuming video on social media platforms, where video generates an average of 135% higher engagement. This could present an opportunity for the video advertising industry, because more and more advertisers are looking to grow their audience and create value.

e.0230361.g002} Statistical  
analysis {#sec013}

----- The  
obtained data are presented as  
the means  $\pm$  standard  
deviation (SD). The intra- and  
inter-assay CV values were  
calculated using the following  
formula:  $\{\text{Coefficient of variation}\ \left(\ \% \right)\} = \frac{\text{SD}}{\overline{x}} \times 100$  where \*SD\* is

---

the standard deviation and  $\overline{x}$  is the mean value. Statistical analyses of the data were performed using the IBM SPSS software for Windows (SPSS, Inc., USA). All the quantitative variables were assessed using the Shapiro-Wilk test and variables presenting non-normal distribution were assessed with the

---

nonparametric test: the Mann-Whitney U test. A p-value  $\leq 0.0001$
