Drawing management Autodesk's Inventor and SketchUp are both based on the idea of DWG (Drawing), which is a hierarchical, multi-file, system for representing two-dimensional drawings, which can be shared across users and repurposed. The AutoCAD software is based on the same concept but does not support multi-file DWGs. Once a DWG has been created, it can be converted to other file formats including, but not limited to, JPG, PDF, SVG, DXF, DWF, EPS and PS. Comparisons Autodesk also provides a similar software in the field of architecture (AutoCAD Architecture), civil engineering (AutoCAD Civil 3D), and structural engineering (AutoCAD Civil 3D Structural). There are also free open-source software for civil engineering (Geo-Designer). In 2006, the IEEE Spectrum listed Autodesk as one of the "10 Coolest Companies in Technology".
