System Requirements For OJOSoft Video Audio Converter Suite:

Turbine's fan force is generated by a direct mechanical connection to the impeller, which powers a motor. Real life motor speeds are between 1000 and 30000 RPM. Measured speeds are in the range of 4500-9000 RPM. Measurements are valid with a certain radius and height of the turbine. Turbine's blade pattern is two-blade (squared off) and has four to five turns, or a circumference of the blades between 8 to 15 cm, depending on the measured speed. The wheel has a
