The Legend of Zelda: A Link to the Past ROM Hacking and Game Patching Did you know that the Zelda: A Link to the Past is actually a sequel to Ocarina of Time? All the way back in 1998 when Ocarina of Time was first released, not many people knew that A Link to the Past was a Nintendo 64 game all along. As Nintendo Power said back then, "A Link to the Past is a second-tier Zelda that serves as a bridge between the two titles," and they were not wrong with their assessment. Zelda: A Link to the Past ROM Hacking or Game Patching is one of the most famous NES ROM hacks that has been developed by the community of ROM hackers and similar to other games, you can re-install the game for free to your cartridges. What are DumpROMs? A dumpROM (Dump Read-Only Memory) is a type of ROM Hack, this type of hack is made to "dump" the ROM file on your system in order for you to search it for its content, meaning to provide you with all the information within the ROM file. This hack is of great advantage when you are the only one that knows the ROM file due to the fact that you can manually search for the needed contents. A ROM hack also needs a software that is able to dump the ROM file, software that can do this is called a DumpROM for those who are still unclear. In this case, the software that was actually designed to do that is called Patcher for it will allow you to dump the ROM file in a lot of different ways, you will also need a tool that will enable you to extract the data from the ROM file.
