CyberLink Media Suite Incl Product Key [Latest]

CyberLink Media Suite is a comprehensive and powerful software suite that integrates multiple programs into a single platform, such as PowerDVD, PowerDirector, PhotoDirector, PowerProducer, Power2Go, PowerDVD Copy, MediaShow, MediaExpresso, PowerBackup, Label Print and WaveEditor. The tool comes with several utilities for helping you organize your photo collection, edit audio files, create mobile phone ringtones or other recordings, rip MP3 and WAV files, burn audio CDs and DVDs, as well as edit videos. User interface Although it implements an entire suite of programs, CyberLink Media Suite delivers a clean and user-friendly environment. You are welcomed by a multi-tabbed layout that allows you to quickly pick the desired category that you want to work with, such as Movie, Video, Photo, Music, Data and Backup, or Utilities. If you click on the desired tab, the tool reveals a set of features for each category. Plus, enabling one of the supported functions opens up the corresponding software program included in the suite. Movie options and video operations If you want to manage movies, you can opt for playing a movie disc, browse and play clips, play a movie folder, and view online info. When it comes to video options, you may play video files, carry out advanced editing operations, organize clips, work with easy editing features, upload items to social networks, convert videos, as well as create or edit a disc. Photo management You are given the option to playback 2D photos in 3D, import and organize images, edit and print them, create or play a user-defined slideshow, generate a photo gallery disc, build a slideshow disc, upload items to social network, and apply advanced photo adjustments. Data and backup features, and utilities You may create a data disc, copy or burn a disc, back up and restore files, duplicate a movie disc, as well as organize discs. The Utilities area is dedicated to helping you erase a disc, extract files from a disc image, mount a virtual drive, transfer media to devices, burn DVD folders, and print a disc label. Favorite apps and several configuration settings CyberLink Media Suite gives you the possibility to create a list with your favorite features so you can access them on the fly, check out a list with all products embedded in the suite, as well as tweak some settings in order to return to CyberLink Media Suite's GUI when you close a
