My most memorable take on the Trump phenomenon is from the 1990s. The speaker was disgraced former White House Counsel Bernard Nussbaum, who was escorted from the building by Capitol police in 1987, following a probe by the Independent Counsel into a spurious land deal he tried to pass off as a government-financed one. But Nussbaum had an impact on me, nonetheless. The problem was that at that time I worked for a newspaper, not for a political party. The Democrats had no real future in the 1990s, so I couldn't really cast around for a figure to support. That was why I supported Richard Nixon, for all the reasons he deserved, even though he's dead. It was fun thinking, "Ah, better this than Clinton." Nussbaum is a key figure in Richard Nixon's Secret War, Bob Woodward and Carl Bernstein's book about the president's campaign in 1972 against Democratic Senator George McGovern. Nussbaum, the son of a prominent trial lawyer, wanted to run for the Senate himself, but McGovern beat him out in 1970. He was a political infighter, who also had a strong legal mind. When Bob Dole was accused of being a war criminal for having served in the Army during Vietnam, Nussbaum made the case that the charge was absurd. He told the Chicago Sun-Times in April 1997 that, "For those of us who've lived through the past few years, there is a historic perspective, and maybe that's why many Republicans don't like him. He represents the past, a lot of people think, and the current Republican Party is focused on the 77a5ca646e

The political stalemate over repeal of the Affordable Care Act (ACA) continued on Friday, as Senate Minority Leader Chuck Schumer said he would call off negotiations on healthcare until Republicans abandon their proposal to replace ObamaCare. "I think it's now clear that we can't move forward with the current proposal of the Republicans because it is a massive handout to the insurance companies and to the drug companies," Schumer said on CBS's "Face the Nation." "The goal of our bill was to provide insurance for every American.... The GOP bill won't do that." ADVERTISEMENT Senate Majority Leader Mitch McConnell Addison (Mitch) Mitchell McConnell Trump 'no longer angry' at Romney because of Supreme Court stance On The Money: Anxious Democrats push for vote on COVID-19 aid | Pelosi, Mnuchin ready to restart talks | Weekly jobless claims increase | Senate treads close to shutdown deadline The Hill's Campaign Report: Trump faces backlash after not committing to peaceful transition of power MORE (R-Ky.) announced Thursday that the Senate would vote on a revised version of the ACA, which would allow states to opt out of ObamaCare rules requiring insurers to cover a range of benefits and allow companies to sell skimpy plans. But Democrats argue that the measure, which only allows a narrow form of skimpier coverage, will effectively increase the number of uninsured Americans, and has vowed to oppose the bill if it reaches the Senate floor. Schumer said the House should vote on its own proposal to repeal and replace ObamaCare, which was approved earlier this week. "We should vote on our bill as soon as possible, and that's what we should do," he said. "We need to vote on our bill." While the world is prepping for the next Manti Te'o scandal to erupt, the Buffalo Bills decided to renew an old acquaintance. According to a report by Josina Anderson of ESPN, the Bills have agreed to terms with former New

What's New In?

A simple iTunes replacement that's designed to have all the features of Apple's new music service, but without the need to buy a monthly subscription. The program has a minimal design with lots of music, a playlist creator, an iTunes replacement and so on. This is a free, unofficial application that will be available for download below. What's new in this version: - New version There are no known issues. Download Apple Music Electron could be the answer to your prayers, of course, if these involve you asking divinity for the opportunity to try Apple's music library without all the extra bells and whistles. This unofficial application aims to deliver a simple Apple Music experience for individuals who are tired of software solutions that include lots of other useless programs bundled together. So what you're getting here is an iTunes replacement if you're a desktop service runner, or a substitute for Apple Music if you're more of an online fan. Either way, the replacement for both cases brings a convincing amount of advantages to the table. How does the application work? After installing the program, there really isn't much to learn about how to operate it. It's a simple, minimalist interface with good looks and plenty of music for you to choose from. You can still sign in with your Apple account, which was to be expected, of course, and browse for the hits and tracks you want to listen to. Preview some songs if you're creating a playlist for the first time. Check more info about the music you're listening to, as you're actually enjoying it. A downside will definitely be those pesky ads that will prompt you to try a paid subscription for Apple Music. Unfortunately, some things never change. Listen to your favorite radios Apart from being able to check your saved tracks and any information these might have attached right on the spot, one can also choose from a selection of radio stations to listen to. These give a fresh feeling as you'll be experiencing new and exciting song styles or genres, without having to sift through the same boring old tracks. The simplicity of the whole system is actually quite attractive. It makes you wonder why Apple hasn't released an official program of this sort on Windows.
