RussAcc

RussAcc is a professional application designed to speak texts, create audiobooks (in wav, mp3, amr or vmo formats), and set accents in Russian text. With RussAcc you can read or listen to books (and rest your eyes), write them to mp3 players and other gadgets as sound files and listen to books anywhere. RussAcc can help you to use your time (in car, train, airport and so on) more rationally. You can listen to foreign texts while studying languages. Also RussAcc can be used as a simple text editor. In Russian many words have different accents dependently of context. RussAcc tries to set them right in Russian texts. It knows more than 3 million word forms with their accents and grammar parameters (but installer is very small). RussAcc remembers text positions for 50 recent files. New and improved features: - RussAcc also saves the accents dependently of context to different files. - RussAcc can set language on fly. - You can now change accent from 6 to 10. - RussAcc now works on win95, win98, win 2000, winXP, win2003, winvista, and also on win7 (may not be fully working) - RussAcc can now be deployed as an application. - You can now open or close current file of RussAcc (in new versions not only next file) - RussAcc now speaks and sets accents in both Russian and English, and has your aproved accents in Russian. - RussAcc now remembers all open windows. - RussAcc can now read and write to file in other languages besides Russian. - RussAcc now remembers last position of file and last position of last word. - RussAcc now remembers last opened document. - You can now set the default keyboard layout. - You can now set the default font to input language on fly. - RussAcc now ignores the seconds in voice offset. - RussAcc now displays the time in voice offset from the start of recording. - RussAcc now saves the accents dependently of context to different files. - RussAcc now shows the next and previous dictionaries. - RussAcc now shows the page you are listening from and the voice. - RussAcc now shows the name of the current file, and the name of the record path. 09e8f5149f

There are 16 recent files and folders under File menu. RussAcc remembers text positions for 50 recent files. In Russian many words have different accents dependently of context. RussAcc tries to set them right in Russian texts. It knows more than 3 million word forms with their accents and grammar parameters (but installer is very small). RussAcc is an abbreviation of Russian Accents and also Russian name of a hare (rabbit). Russian is more complex than English and many words have different accents dependently of context. Wrong accents wound the ears, so RussAcc tries to set them right in Russian texts. It has more than 3 million word forms with their accents and grammar parameters (but RussAcc installer has less than 2.5 million bytes). Theory and practise of RussAcc: -------------------------- RussAcc can set accents of Russian texts for three categories (typography, russo-international and pronunciation). There are 4 fonts in this topic. In the end of section you can see a guide (only for tutorials) of accents setting of texts (it is the same for all categories of accents). Simple texts: -------------- RussAcc is designed to read texts and create sound files of audiobooks, but you can use this program even to read the manuals of computer hardware. RussAcc requires Windows Vista or higher system. It's tried to use all latest DirectX, Windows Compatability and audio codecs included in Windows. Command line of RussAcc: ------------------------- 1. Download and run RussAcc.exe 2. Click on the file "RusAccSetup.msi" for configuration. 3. Click on the file "RussAccRun.bat" for the second part of installation and to run program.

He is a two-time World Boxing Association (WBA) bantamweight champion, having defeated Andrew Golota and Albert Cobarrubias for the belt. Amateur career José Luis Santoyo is an undefeated amateur. His record includes 130-3 with no defeats, and was National Federation of Amateur Boxers Champion. Professional career Jose Luis Santoyo turned professional in 1979 and in his first fight he took the WBA bantamweight title from Guillermo Juarez via decision at the Arco Arena in Mexico City. Santoyo took on the WBA world bantamweight title holder Andrew Golota in the IBF version of the WBA bantamweight title, at the Vicente Fernandez Arena in Caguas, Puerto Rico, on March 3, 1983. In round three, Santoyo dropped Golota with a body shot. Then in round five, Golota went down again with a body shot. The referee judged the bout a close, even fight and awarded it to the challenger. Santoyo fought Albert Cobarrubias at the Amphitheatre in Mexico City on October 1, 1983. In round one, Santoyo was dropped with a punch, but bounced back to knock Cobarrubias down in the second. The third round was rather one-sided with Cobarrubias using his experience and guile to dominate. In round four, Cobarrubias had Sant
